Attachments: DRAFT EtO Emissions Table 8-6-20.docx

Check out the footnote I added. The 2019 Huntsman reported TRI emissions (which I'm assuming are from normal operations) are about the same as event emissions I found on TCEQ's website, so I'm guessing the total is actually double the reported amount.

It will be interesting to see what TCEQ's 2019 emissions inventory report says because that report contains both routine and event emissions. .

Hi Ruben,

I went ahead and updated the numbers on this document, I did not see any data for Shell Technology Center in Houston, TX. Please let me know if I missed this.

I did a percent change form 2014 following the pattern of the other columns. If you wanted a comparison to 2018 instead, I can do that as well.

-Nia
